GitHub: github.com/daiyankabir
Date of Birth: 03 July 2000

Professional Summary

Senior Quality Assurance Engineer & Software Developer with 4+ years of experience in Python, C# (.NET), REST API testing, and test automation. Experienced in building automated test suites, analysing product source code for root-cause analysis, and integrating continuous testing into CI/CD pipelines (Git, Docker, GitLab/Azure DevOps). Strong background in test strategy, API validation, and cross-functional Agile collaboration.

Education

01.04.2025 – Present **MSc in Software Engineering**
Universität Hildesheim, Hildesheim, Germany

- Studying software architecture, secure systems, distributed databases, and modern software development practices
- Applying concepts related to testing, debugging, and structured software delivery in academic work

01.09.2021 – 19.03.2023 **MSc in Computer Science**
American International University-Bangladesh, Dhaka, Bangladesh

- Learned Advance web development, NLP, Computer vision, and Machine Learning
- Research with new 5G network technology for modern life

Professional Experience

06.2026 – Present **Senior Software Quality Assurance Engineer**
KI2 | KI-Quadrat Systemhaus GmbH, Vienna, Austria (Remote)

- Own the test strategy and test planning for the project, including risk-based prioritisation and estimation
- Lead functional, regression, integration, API, and performance testing efforts
- Define and track quality metrics and make clear release-readiness recommendations
- Triage and root-cause complex defects, working closely with developers
- Review test cases and automation written by junior and mid-level engineers, and mentor them
- Act as the QA point of contact for client stakeholders, communicating quality status, risks, and trade-offs
- Developed automated test scripts and API validation suites using Python (PyTest) and Postman/HttpClient, integrating automated test runs into GitLab CI/Azure DevOps pipelines.

09.2022 – 08.2024 **Software Developer**
DataSoft Systems Bangladesh Ltd., Dhaka, Bangladesh

- Built full-stack web applications in Python/Django and MSSQL that improved platform performance by 40%
- Designed RBAC permission modules and granular access control systems, improving client satisfaction by 15%
- Wrote, executed, and maintained test scenarios for backend features, APIs, user workflows, and access control logic
- Performed regression, functional, and exploratory testing to identify defects early and reduce production issues
- Scaled backend services to handle a 150% increase in concurrent users while maintaining stability and reliability

- Reduced bug rates by 30% through systematic code reviews, issue tracking, and CI/CD pipelines using Git and Docker
- Automated backend testing workflows and operational scripts using Python and PowerShell across Linux and Windows environments.

07.2021 – 08.2022 **Software Engineer**

Management and Training International Ltd., Dhaka, Bangladesh

- Developed backend features using C# and .NET, focusing on server-side logic, maintainability, and reliable delivery
- Supported test execution by validating database operations, API behaviour, and core application workflows
- Led development of an internal management system, improving data processing efficiency by 25%

01.2021 – 06.2021 **Software Engineering Intern**

Ambitious Softwares, Dhaka, Bangladesh

- Assisted in backend development using C# and .NET, focusing on debugging, code review, and issue analysis
- Contributed to CRM development work, improving data accuracy and user satisfaction

Skills

- **Languages & Frameworks:** Python, C# (.NET / .NET Core), PowerShell, Django, LINQ, SQL
- **Test Automation & Tools:** NUnit / PyTest, Selenium WebDriver, Postman, HttpClient / RESTful API Testing, TestRail, Jira
- **CI/CD & DevOps:** Git, Docker, GitLab CI / Azure DevOps / TeamCity, CI/CD Pipeline Integration
- **Environments & Concepts:** Windows, Linux, Test Strategy & Planning, Root-Cause Analysis, Defect Triage, Agile/Scrum
